Title: How to activate Digital Secure Key

Are you ready to make logging on so much easier?

A fast, easy and secure way to log on to your HSBC accounts – all in the palm of your hand

Activate your Digital Secure Key now with a few steps

To get started, log on your HSBC Singapore app

Click "Confirm and continue" to activate your Digital Secure Key

Your Digital Secure Key is now activated successfully!

You can now also enable fingerprint or face ID to easily generate your security codes.

You can now access Online Banking quickly and easily with Digital Secure Key

Steps to generate your security code

Go to the Log On screen

Click "Generate security code"

Choose the code type you would like to generate – Log on to Online Banking, Transaction verification or Re-authentication code

Authenticate with your 6-digit PIN or biometrics

Security code is now generated!

Use the code to complete Online Banking verification before it expires. Log on to Online Banking...

To confirm transactions

And to complete re-authentication
